## Quick Facts About Radon

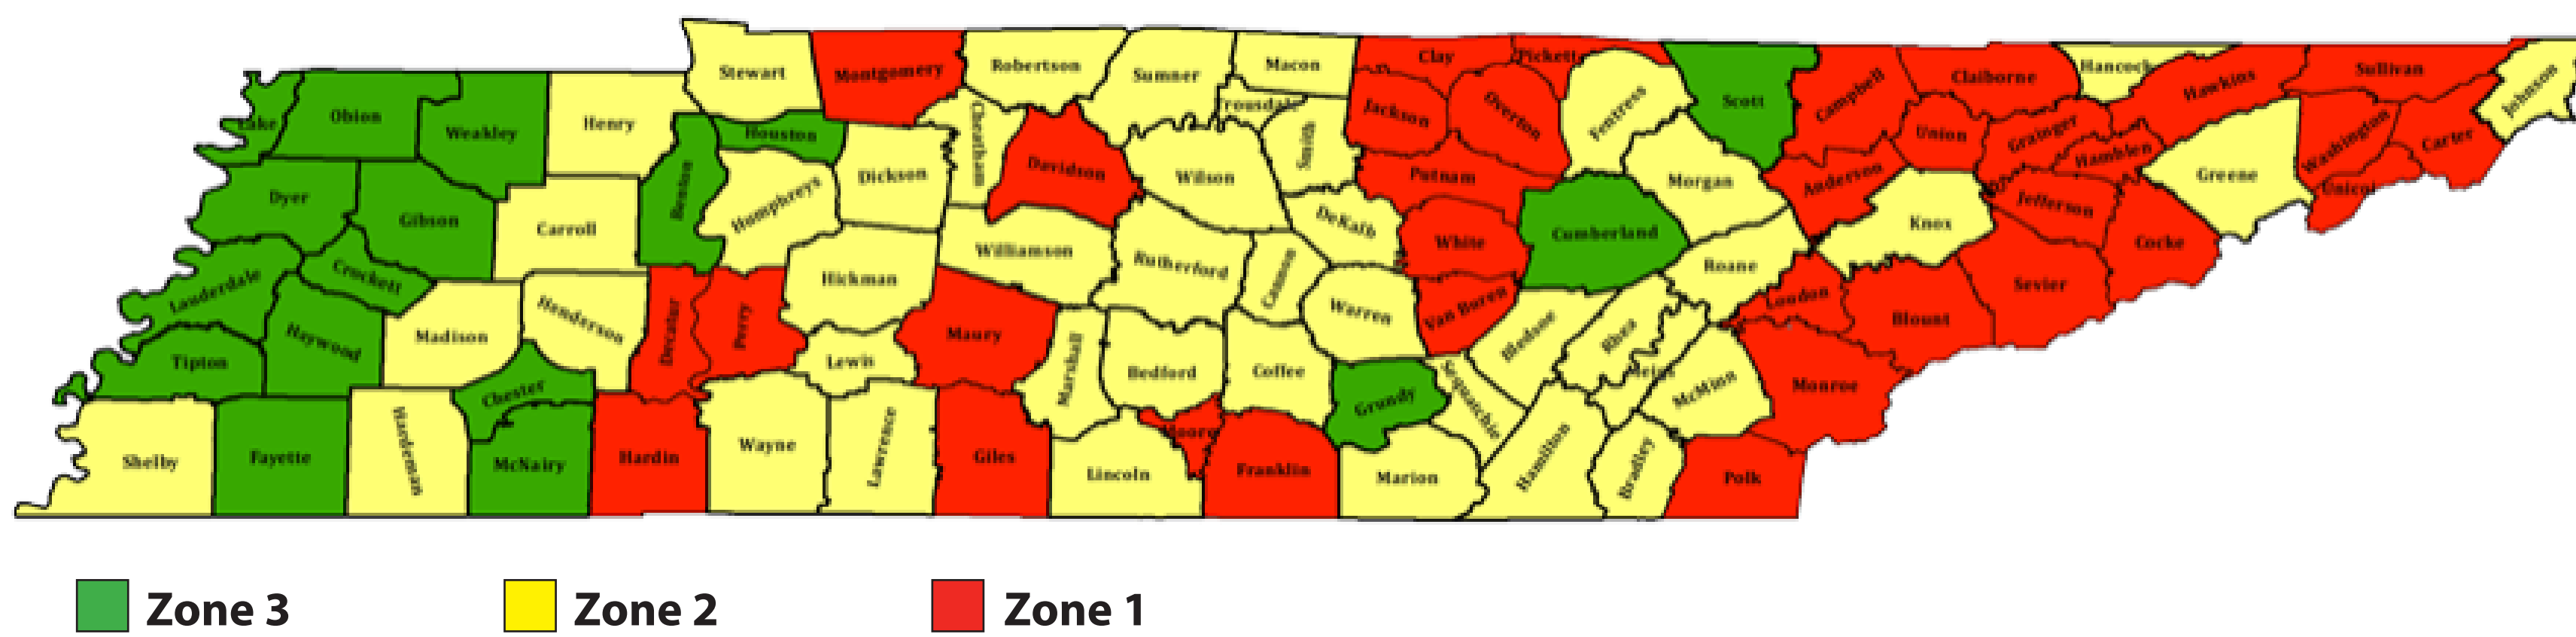

### 1

#### RADON & LUNG CANCER

Radon-induced lung cancer is the #1 cause of death in homes. 1 in 4 Tennessee homes has high levels of radon.

#### RADON DATA FOR TENNESSEE

### 2

#### HOW DO I TEST MY HOME FOR RADON?

### 3

The only way to know the radon level is to test. The Tennessee Department of Environment and Conservation (TDEC) offers free radon test kits while supplies last: <https://bit.ly/3tbGSm1> or purchase online at [www.sosradon.org](http://www.sosradon.org)

### 4

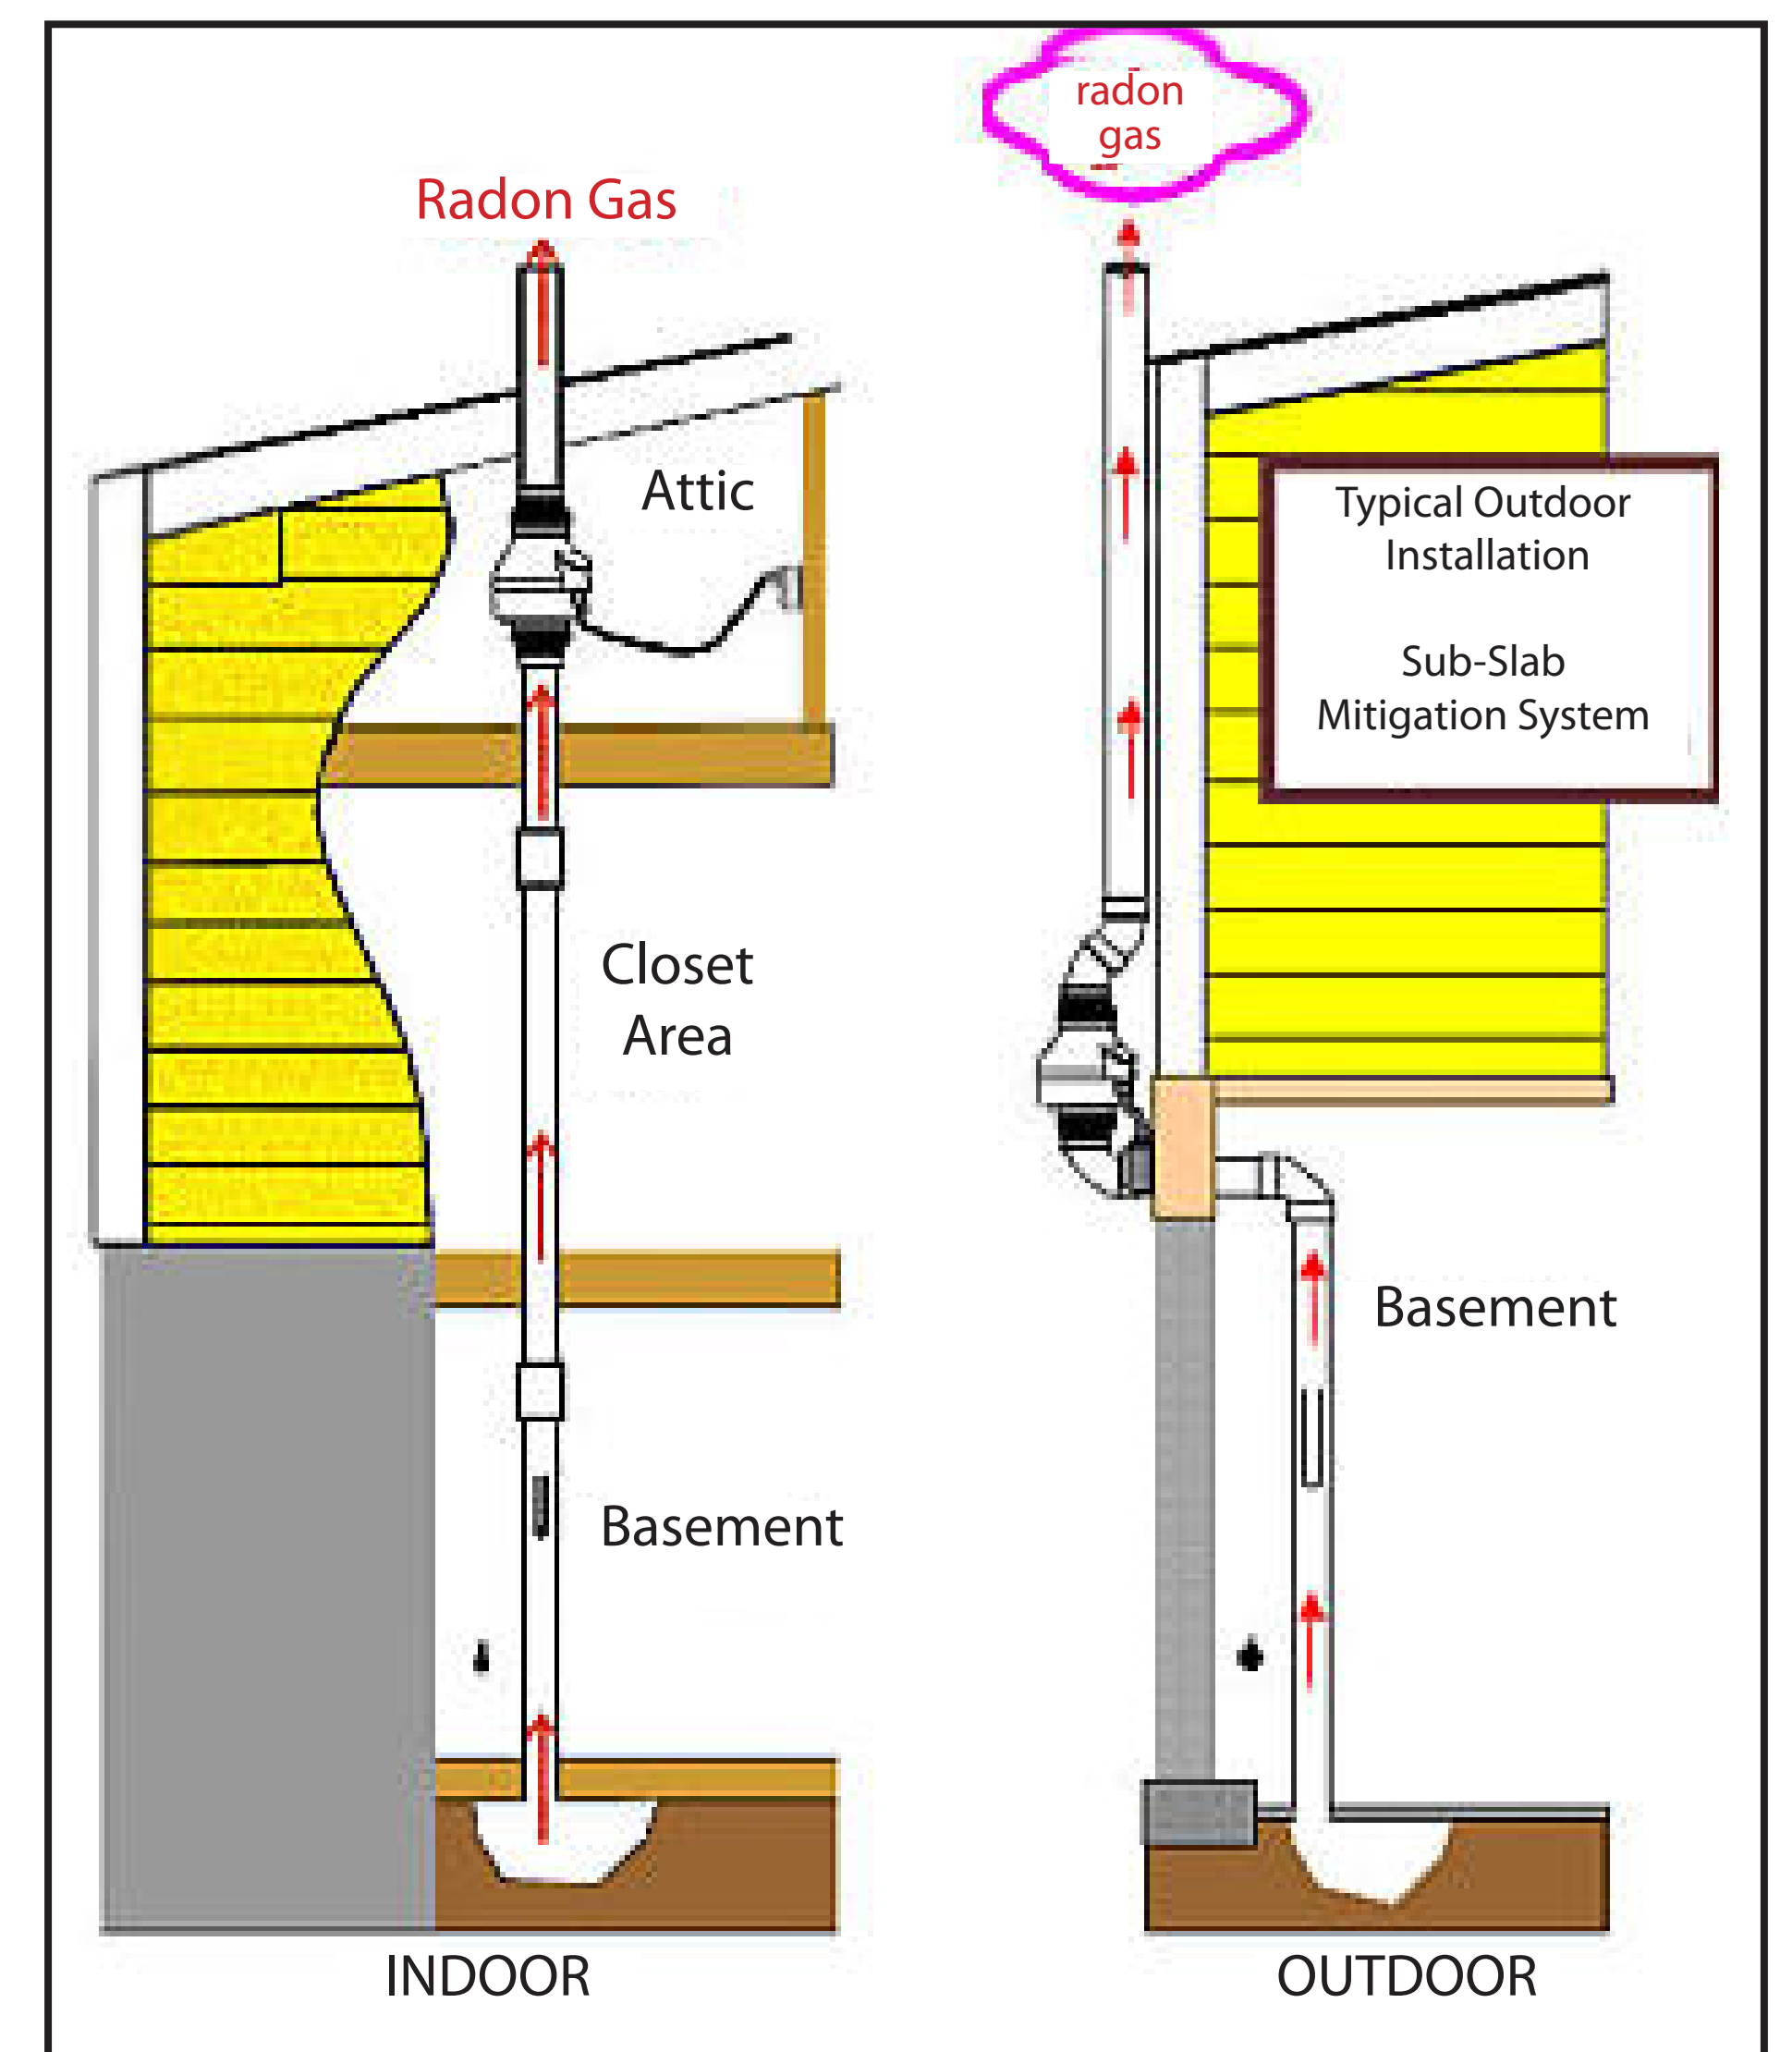

#### I'M BUYING A HOUSE. HOW DO I TEST FOR RADON?

Tennessee law requires disclosure of known radon hazards during property sale. It is recommended that a radon professional conduct radon tests during real estate transactions. <https://tn.gov/environment/radon>

### 5

#### MY HOME HAS ELEVATED RADON LEVELS. WHAT NOW?

Radon mitigation systems will reduce radon to below 4.0 pCi/L in 95% or more of homes
